PROJECTS

Personal Portfolio Website - https://tbush5.github.io/TylerBushPortfolio/ **(Fall 2023)**
Created a personal website using ReactJS to demonstrate my front-end development skills and deployed the website with GitHub pages.

Mouser - https://github.com/oss-slu/Mouser (Capstone Project, Senior Year)
Participated on a team to develop an app for a Saint Louis University researcher; built an app in Python and designed it to optimize the researcher's workflow for testing on animals in the laboratory.

Sudoku Solver - https://github.com/tbush5/SudokuSolver (Junior Year)
Developed a program in Python that uses the backtracking algorithm to solve any solvable game of Sudoku.

Closest Pair - https://github.com/tbush5/ClosestPair (Junior Year)
Developed a program that uses the divide and conquer algorithm to find the two closest points on a graph in C++.

WORK EXPERIENCE

Grey Eagle Distributors – St. Louis, Missouri   **Mar. 2020 to Present**
An independent distrbutor of the Anheuser-Busch portfolio and other beverages serving the St. Louis County market area.

Merchandiser

- Fostered relationships with key retailers, provided merchandising and sales support at retail accounts, offered exceptional customer service, and responded immediately to special requests in a part-time and seasonal role while attending college.
- Supported sales and delivery teams by building impactful displays and gaining prime point-of-sale positions to promote the beverage portfolio at grocery and big box stores including Dierbergs, Schnucks, Walmart, and Target in the St. Louis region.
- Replenished shelves, rotated stock, and conducted inventory to avoid out-of-stock, contributing to a growth in sales

World Wide Technology – St. Louis, Missouri   **May to Aug. 2022**
A global technology solutions provider that accelerates transformational outcomes for large public and private organizations.

IT Intern

- Worked in an environment where agile development was promoted, encouraged, and emphasized; quickly learned Ansible and PowerShell scripts to automate service desk tasks, freeing employees' time to focus on more meaningful work.
- Reliably and consistently fixed failed automated jobs and other service desk tasks manually.
- Maintained distribution lists and tracked software licenses for employees located throughout the U.S.
